

Double Step Ladder (Plastic)

- Bilaterally ascendable step ladder made of 100% glass-fibre reinforced plastic for working at electrical installations
- 80 mm deep, non-slip and profiled steps with rounded front edge
- Rail ends with replaceable, non-slip, profiled foot caps for safe foothold
- At the ladder top, the steps form a large area to place things measuring ca. 200 x 300 mm
- Abrasion-resistant rails prevent dirty hands
- Applications: Refrigerated warehouses, chemical industry, power plants, etc.
- DIN-DS/EN 131
