

## Platform Ladder Vario Compact

- Unilaterally acendable, foldable aluminium platform ladder with innovative stabilizer system
- Large aluminium platform 650x600 mm with corrugated surface
- Various stabilizer widths and ballast weights enable to reach safe working heights by narrower floor space
- Profiled, 80 mm deep steps for safe ascent
- With hand rail on both sides and three sided platform rail
- The best solution for the use in shelf gangways with narrow widths, working heights of more than 4 m by only 820 mm outer width

Increased stability through ballast weights by the stabilizer
