

STABILO®

Shelf Step Ladders

T-Rail System

- Aluminum step shelf ladder with integrated top guide rail for T-rail system
- Due to clamping joints of the T-rail holders, drilling into the fastening rail is not necessary (please provide dimensions of fastening rail in your enquiry)
- Solid braced step-/rail joints with 80 mm deep, profiled steps ensure safe ascent and comfortable standing
- Two self-locking brake roller (ø 80 mm) for easy moving and the two-component foot caps ensure safe foothold during ladder use
- Ladder inclination 21°, space-saving parking in a position vertical to the shelf
- Handrail and holding bar available as accessories (page 44)

In your order, please provide the exact vertical height: Floor to lower edge shelf stabilizer (1).

Working height to	ca. m	2,94	3,17	3,41	3,64	3,88	4,11	4,35	4,58	4,82
