STABILO[®] Professional Ice-free scaffold system

All vehicle drivers are responsible for a roadworthy condition of their vehicles. Each entrepreneur is obliged to instruct its drivers.

According to paragraph § 1 of the road traffic regulations (2 StVO) no traffic participant may be endangered or jeopardized. In case that a vehicle loses for example snow or ice pieces during the journey, an offence has been committed.

+ Pre-equipped with a wosatec QR code label for easy digitalisation of work equipment inspection documentation

Safety under any weather conditions

Maintenance and cleaning works are extremely safe and comfortable due to threepart side protection and perforated steel platforms in all weathers.

Economical and flexible application throughout the year

With 2 working levels (1st level can be safely used with accessories "rail extension set" **1**) the scaffold may be used all-season for e. g. for truck maintenance or cleaning works. It may be used free standing (incl. outriggers) outdoors or fixed to a wall.

3 meter high platform made of scaffold system parts

Optimal access to any truck due to 3 m standing height. Total length may be altered individually with 3 m field width. Due to height-adjustable foot plates the system can also be used on uneven ground.

Non-slip, wide and comfortable stair access

The driver comes up to the working platform fastly and safely in order to remove the roof by snow and ice. The safety barrier set **4** prevents unauthorised access to the system.

Ice-free scaffolding system		Art.-No.
Platform size	6.00 m	970046
Platform size	9.00 m	970053
Platform size	12.00 m	970060
Platform size	15.00 m	970077

Important hint according to §1 par. 2 StVO!

According to the road traffic regulations each vehicle driver must clear its vehicle before departure by e. g. ice, snow and branches.
