

Safety accessories

Outrigger for different ladder types

- + These telescopic outriggers are developed to support hinged, multipurpose, step and leaning ladders
- + They are continuously adjustable and can therefore easily be set up on all kinds of ground surfaces
- + KRAUSE outriggers are available in two different versions, a rigid one and a rotatable one. The rigid version is developed for step and leaning ladders and the flexible rotatable one for hinged and multipurpose ladders
- + Usable with many different accessories on different kind of ground surfaces

Safety information:

- + Outriggers can be fitted and used on all fully functional ladders that are certified according to EN 131
- + Outriggers are never a replacement for a supporting surface (e.g. house walls). They are only to be used as an additional support and protection device
- + The use of this multifunctional safety device does not remove the need to apply caution and care to ensure safe use of ladders
- + Always consider the ladder's manual before using the ladder.

Outriggers	Size	1 (Pair)	2 (Pair)	1 (Pair)	2 (Pair)
Ladder type		Leaning & step ladders	Leaning & step ladders	Hinged ladders	Hinged ladders
Number of rungs / steps		7-11	12-14	7-11	12-14
Article No.		832023	832030	832009	832016

Additional equipment for outriggers

Safety foot, rotatable

- + For greater stability on smooth surfaces and grates
- + ø 150 mm

Article No. (piece)

832054

Support plate with spike

- + For use on natural soft ground
- + ø 150 mm

Article No. (piece)

832047

Safety accessories

Multifunctional safe guard

- + The multifunctional safe guard system can be used as a spacer device, a roof support, a fall protection or as a combination of all
- + To reach full function, the basic module simply has to be equipped with the designated additional modules
- + The multifunctional safe guard can be fitted and used on all fully functional ladders with rungs that are certified according to DIN EN 131

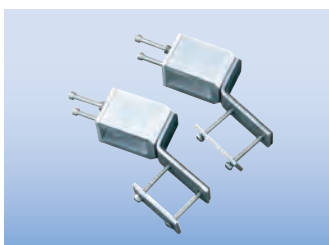

Basic modules/accessories

Side rail fastener with an angled stop

- + The side rail fastener with an angled stop is the mount for the insert stabiliser and can also be used on its own as an angled stop for leaning ladders

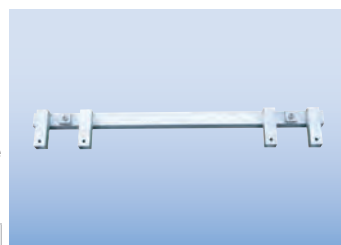

Article No. (Pair)	832122
--------------------	--------

Plug-in stabiliser

- + The stabiliser is a basic modul usable with all accessories shown on this page. It can be used as a safety device as well as a spacer and is also adequate as climbing equipment for roofs
- + Width 900 mm

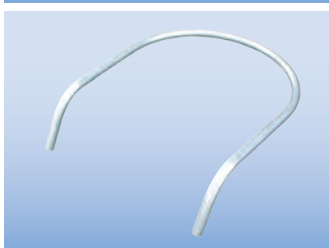

Article No. (piece)	832115
---------------------	--------

Back protection bracket

- + Increases ladder safety, developed to be used with the plug-in stabiliser, article no. 832115

Article No. (piece)	832153
---------------------	--------

Working tray

- + Storage device for tools and other small items while working on a ladder
- + Can be either fitted to the left or right side or on both sides at the same time

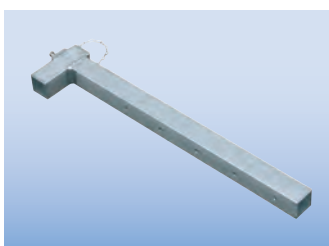

Article No. (piece)	832146
---------------------	--------

Angle piece

- + Developed as a mount for ladder spacers and rubber buffer
- + Caution: For safety reasons angle pieces and spacers are only to be used as pairs fitted to both sides of the basic module at the same time

Article No. (piece)	832160
---------------------	--------

Spacer with castors

- + A stand-off device with locking holes usable to adjust the spacing distance
- + To extend easily ladders on walls
- + Fitted with a safety screw

Article No. (piece)	832177
---------------------	--------

Aluminium hand rail

- + Usable on one or both sides
- + For more safety when climbing over the ladder's top onto e.g. a roof

Article No. Rail (piece)	832139
--------------------------	--------

Article No. Side rail fastener (piece)	832092
--	--------

Rubber buffer

- + Protective and anti-slip buffer for use on smooth ground e.g. load-bearing glass surfaces

Article No. (piece)	832184
---------------------	--------

Allpurpose mast castors

- + To bring leaning ladders easily and safe in the right position
- + To prevent ladders from sliding unintentional to the side

Article No. Size from (60 mm)	832078
-------------------------------	--------

Article No. Size from (200 mm)	832061
--------------------------------	--------

Anti-slip platform

- + Anti-slip aluminium corrugated platform to enlarge the support base area
- + Easy to use
- + Platform can be safely stepped over when folded down

Article No.	832085
